

SILVER Newsletter

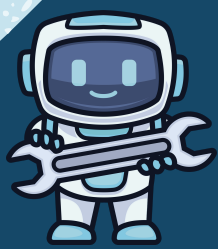

Issue #1, July 2025

Welcome Letter

Welcome to the first edition of the SILVER Project Newsletter! We are thrilled to share updates from our Erasmus+ project dedicated to training older adults with vital finance skills for life in the digital age. Through our educational work accompanied by AI-powered tools and exercises, we're making learning effective, friendly, and tailored to seniors' needs.

Stay tuned for more insights, resources, and opportunities to get involved!

About the project

To support older adults in gaining the confidence and skills needed to manage their finances safely online, we're creating:

- An e-Studio with 4 short learning modules on digital banking, payments, and online safety, designed for self-paced learning;
- An e-Guide to help adult educators support seniors throughout the learning process.

Recent activities

- **Kick-Off Meeting.** The Erasmus+ Silver project partners met in Kaunas on March 6–7, 2025. Partners discussed digital financial literacy, exchanged ideas, and planned future steps.
- **Course development.** We're building the e-Studio—a self-learning platform for seniors with 4 short courses on digital finance, AI tools, and online safety. It combines videos, AI powered exercises, and face-to-face sessions to support digital inclusion.
- **Website launch.** EINC has created a website to share information and project results.

What's next

e-Guide development: partners are creating an e-Guide for adult educators to support the e-Studio. It will include:

- **Methodology for using AI tools;**
- **9 session plans (self-learning, face-to-face, assessment);**
- **A strategy to assess progress and award digital badges.**

- **Educators training in Paris (Dec 2025).** Partners will train six educators (two per partner) to pilot the e-Studio using blended and reversed learning.
- **Pilot Workshops (early 2026).** The e-Studio will be tested in two countries with 48 seniors, focusing on inclusive, AI-supported digital finance training.
